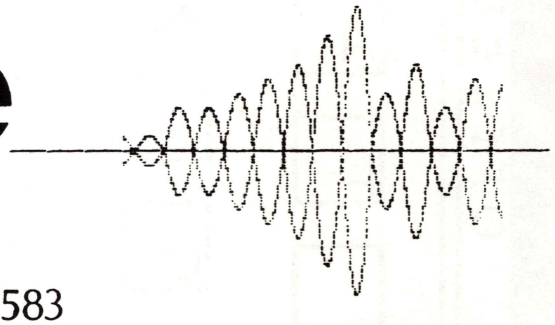
"We have had a QL for about one week now and are just beginning to appreciate the power and versatility it contains. Keep in mind that for the price . . . There is nothing that compares with it."

The QL Report
published by Curry Computer
February 1, 1985

We know the QL... we've been appreciating it longer.

Write for our free catalog.

SyncWare News



P.O. Box 64
Jefferson, NH 03583

SyncWare News is a journal by, for and about Sinclair-Timex hobbyists. We bring you projects, listings and articles written and developed by fellow hobbyists. We at SyncWare want to stimulate and challenge your imagination. We want to give you ideas and computer know how. We want to take you to the core of your computer and show you what makes it tick. You won't get fluff with SyncWare News. Instead, you'll go right to your computer's roots with useful enlightening program listings and detailed sophisticated hardware improvements. SyncWare brings you KNOWLEDGE. Why not subscribe today.

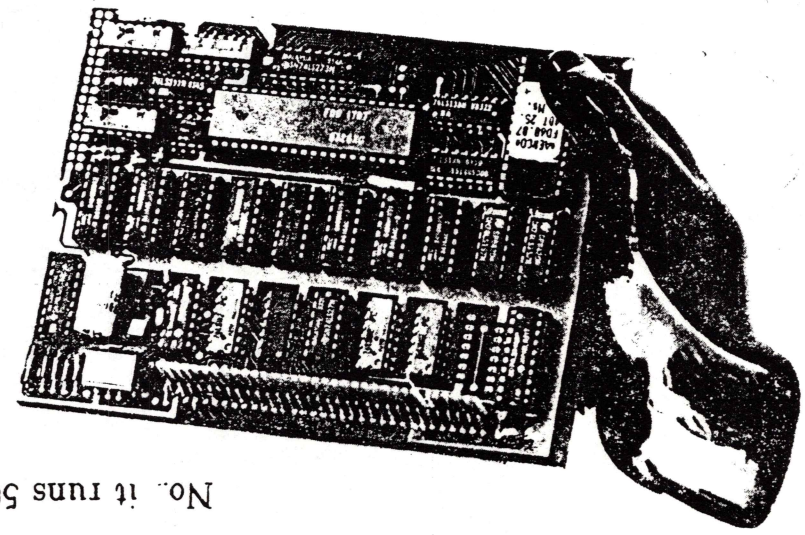
Q. Is it true that this AERCO Disk interface for the TS-2068 runs 3.2 Megabytes of on-line CP/M™ software... and 30% faster than the Kaypro II™ ?



A: No.. it runs 50% faster.

CP/M is a registered trademark of Digital Research, Inc.
Kaypro II is a registered trademark of Kaypro, Inc.
Fancy Font is a registered trademark of SoftCraft, Inc.
RP/M is a registered trademark of microMethods, Inc.
Gemini 10X is a registered trademark of Star Micronics, Inc.

All of this text was generated on a TS-2068 with Fancy Font™ running under RP/M™ and output to a Gemini 10X™ printer (with a recycled ribbon).

SATURDAY

PROGRAM OF EVENTS

9:30am **WORD PROCESSORS** **by Mark L Fendrick**

A comparitive discussion of T/S Word Processors led by a nationally known author, considering the good and bad points of several programs.

10:45 **Machine Language Discussion** *

For users who wish to exchange ideas on machine code programming using the Z80-CPU and for novices who desire some pointers on programming in machine code.

12:00n **Music Programs** *

Exchange of ideas and music for available programs. Open discussion.

1:15pm **Modems & Telecommunications** **by Randy Gordon**

The TS 2068 Bulletin Board Service Program will be available for copying and the creator Randy Gordon will be on hand.

2:30 **CP/M Systems** **by Jerry Champkis**

What is CP/M and how do you use it? Ask Jerry Champkis of AERCO who has just released his own version of C/PM for TS 2068.

3:45 **TS Clubs Round Table Meeting** **Open Discussion**

We would like at least one member from each club to be present to discuss national unity and other issues concerning the TS computer user.

* Indicates that at press-time a definite speaker or discussion leader had not been specified for this event.

FISH LOCATER

THE PROGRAM THAT TELLS YOU WHEN, WHERE AND HOW TO CATCH MORE FISH!

LET YOUR COMPUTER REVEAL THE SECRETS OF THE PROS!

Best Days to go fishing
Best Locations on the water

SUNDAY

PROGRAM OF EVENTS

9:30am **TS 2068 Special Applications** **by Randy Gordon**

This is the time for users to show off and tell others about their interfaces, robotics, buffers, and other applications.

10:45 **ZX81/TS1000 Applications** **by Mark Fendrick**

This is a intended to be a round table discussion for interested users on projects for the TS 1000 family, led by a ZX81 pioneer. These could include robotics, new programs, interfacing, etc.

12:00n **QL Sinclair Computer** **by Gary Solomon**

A demonstration of the QL and a time for QL users to exchange ideas.

1:15pm **Computer Literacy** **by Jack Roberts**

This is a beginners guide to computers - what are they and why use them? It is a good start for all who don't compute but might like to.

2:30 **Forth Language Programming** **by Gary Ganger**

Forth opens up a whole new area of computing for the Timex Sinclair user. What it is and how you can get it for your computer.

3:45 **Filing Programs** **by Tom Woods**

Various filing programs will be discussed, demonstrated and compared. Led by the creator of the popular Pro-File programs for the TS 1000 and 2068.

Each event is to run a maximum of one hour. Fifteen minutes are allowed for set up and removal of equipment.

A fast reliable dual-drive storage system

Integrated System

The Wafadrive is a complete system which contains the micro interface, two 128K drives, RS232 and Centronics ports, all in one attractively-styled, compact unit. There is a minimum of connecting leads and no extra boxes to clutter the desk top. Like the majority of professional systems, the units are dual drive. This offers the optimum balance between system flexibility and cost. Built-in serial and parallel interfaces allow the direct connection of just about any popular printer.

Our new catalog, featuring exciting Timex/Spectrum hadware and Wafadrive software is now available free!

Fast and Reliable

The Wafadrive achieves very fast loading and saving, but not at the expense of reliability. Extensive research and the use of high grade materials ensure that the Wafadrive will give years of dependable operation. Data integrity is on a par with floppy disk. The fully interchangeable wafers are available in three sizes-128K, 64K and 16K. Low capacity wafers give faster access. They are therefore most suitable for program development applications. The high capacity wafers are suitable for more general data storage. Loading rate is approximately 2K per second-almost twice as fast as similar products.

Spectrum Emulation

The new *Rainbow Plus* interface converts the Timex 2068 to a Spectrum! The *Rainbow Plus* is both an emulator and Spectrum compatible expansion buss all in one. The improved Spectrum operating system allows you to run thousands of Spectrum software titles as well as Spectrum hardware (like the Wafadrive) on the Timex 2068.

Software

Armed with the comprehensive user manual, blank wafer and word processor supplied, you can use your Wafadrive right away. There is also a rapidly growing range of software to enable the programmer and games player to exploit the Wafadrive system to the full.

Attention SINCLAIR and TIMEX/SINCLAIR owners!!
HARDWARE and COMPUTER CONTROL projects
for ZX81, TS1000, TS1500 and some for TS2068 too!

BUILD A
MICROCOMPUTER-CONTROLLED ROBOT

AND OTHER COMPUTER CONTROL PROJECTS

BY B.C. TAYLOR

The best "How to" and "Learn by doing" robotics and computer control book available.

Are you tired of books which are full of useless projects that the author obviously never built?

Do you want to learn about computer control and robotics by actually building and operating equipment that doesn't cost thousands of dollars?

Then this is the book for you!!

The book gives complete details so you can build a Golden Droid Award winning internally computer controlled robot for a few hundred dollars.

Plus other inexpensive control projects too!

The price is just $10.95 + $2.05 shipping ($13.00 total). Send your check or money order to: BUDGET ROBOTICS & COMPUTING, BOX 18616, TUCSON, AZ 85731
